You need to find the Exploded Layout for the Feathered Star before you can continue. The Exploded Layout should have been placed with Chapter 5 when you cut out the foundation papers and templates in the Introduction Booklet.

At the bottom of the Exploded Layout you will find the Color #’s printed on each section of the border layout. On the foundation papers you will find the template numbers printed on each section.

Note, that the exploded layout is a drawing of the front-side view of the finished quilt which is a mirror image of the lines printed on the foundation papers.

Position the foundation papers in the order they will be sewn together at your table. Position the papers with the backside facing up. This means you will not see the printed lines. You should have (4) foundation papers in each stack.

Trace the dashed lines on the backside of the first unit in each stack to show the individual sections on the backside of the paper.

Before you begin paper piecing match the templates up with each section of the foundation papers. Arrange the fabric pieces following the order of the color layout on each set of foundation units. Stack four fabric pieces for each section. Note make sure the fabric pieces are positioned facing right-side-up.
