If you use the Quiltster file and color the noted fabric references related to each reference in the pattern with the same fabric, you can follow the cutting instructions exactly. If you choose to make the fabrics different, you will get properly calculated yardage, but you will need to translate the instructions on Page 2 to your specific colorway to cut and organize your fabrics before you get started.

Blue & Purple Color Layout

Note: To complete the teal and peach layout flip the diagonal flow of the colors.
