

LAYOUT AND QUILTSTER COMPATIBILITY

The layout to the left shows the placement of all the fabrics from the Front Side of the Table Runner. This will match your Quiltster image. If you don't have Quiltster, but want to play with the colorway of your pattern, there is a second image below, or there are additional print outs available on our website for each pattern under the Official Samples listing. Just open the image, right click, save to your computer, then print. With Quiltster, you can quickly apply real fabric images, create your own unique look to this table runner.
