

### On-Point Queen Assembly

**Illustration 1:** The center should already be assembled up to Assembly Graphic 4 from TP 677. Place the queen border pieces on the wall as shown. A kitting sheet for one option, which pairs the cover quilt colorway with the Sunbeam Queen Border is available on the website. Scan the QR Code on the back of the pattern to go directly there, then scroll down to the available kitting sheets.

*The original graphic has the rotation on the blocks mixed up. Please reference this graphic instead.*

**On-Point Queen Assembly Illustration 2:** Sew the borders together and press the seams clockwise, from the front.

**On-Point Queen Assembly Illustration 3:** Create (4) quadrants, by sewing the border onto each Center wedge. Press the seams toward the border.
