

GROUP G CRYSTAL BALL FABRIC S1 TO S8 LAYOUT GRAPHICS (PAGE 22 & 23)

Whether you have chosen rainbow fabrics or 8 different fabrics, (or even less, but labeled everything as 1 to 8), the layout below will help you get all your fabrics in the right location and sewn to the right units.

Color Layout Graphic 1: This graphic shows how all of the Group G blocks are laid out. In this case, you will be completing the (16) wedges as shown in the assembly graphics on TP 679, which will finalize your Group G chapter.

Color Layout Graphic 2: The graphic below is color Layout Graphic 2 and is a reference that will help you get started with how to add your Group B Color Groups(CG-B). This shows how the Group B pieces pair up with your Group G pieces. It is more for reference at this point than for assembly. Sewing the Group G and Group B sections together will happen during final assembly of your project.
